Dear Scituate Electricity Customer,

The Town of Scituate is offering a program called Scituate Community Choice Electricity. The Program is a carefully designed alternative to your current electricity supply options, which includes those offered by National Grid and other third-party electricity suppliers. Through the Program, Scituate aims to provide electricity products that increase our community's renewable energy use and reduce carbon pollution.

The Program cannot guarantee savings compared to National Grid Basic Service for the duration of the Program pricing because future Basic Service rates are unknown.

Program prices could also increase as a result of a change in law that results in a direct material increase in costs during the term of the electric supply contract. A commission fee of \$0.001 per kilowatt hour (kWh) for the aggregation consultant is included in all Program rates, of which \$0.000025 per kWh will be paid to the Metropolitan Area Planning Council. Scituate Community Choice Electricity rates also include taxes which are billed as part of the power supply charge.

Scituate Community Choice Electricity rates apply to service beginning and ending on the days of the month that your meter is read. Rates indicated above are for Supply Services only.

Some products contain additional Renewable Energy Certificates (RECs) above that required by MA law. The additional RECs qualify for MA Class I designation from generation located within, or delivered to, New England.

RENEWABLE ENERGY DETAIL

The Commonwealth of Massachusetts requires that all electric supply products include a minimum of 59% renewable energy resources in 2023 and 62% in 2024. This requirement includes “premium” sources, known as MA Class I, as well as other sources. For details on all required sources, see www.mass.gov/service-details/program-summaries. Some Program products contain additional renewable energy that exceeds the minimum required by the Commonwealth, as shown below.
